

RADAR AI LPR 4X/12X PRO BULLET PLUS

Smart Traffic Enforcement Camera

3D Radar

Advanced 3D Radar Technology

Radar is a detection technology that uses radio waves to determine the velocity, range, or angle of objects. Milesight 3D radar can locate the vehicle position and direction with high accuracy. Verified by 3D radar and AI-powered LPR algorithm, the Radar AI LPR 4X/12X Pro Bullet Plus Network Camera can precisely provide information of detection distance, speed capture and flow control, greatly optimizing traffic monitoring, and ensuring the safety of public transport.

<p>3D Radar Localization</p>	<p>Up to 90m Detection Distance</p>	<p>Up to 200km/h Speed Capture</p>
<p>More than 95% High Recognition Accuracy</p>	<p>Up to 4 Lanes Monitoring</p>	<p>Up to 32 Vehicles Detected at One Time</p>

Intelligent AI-powered LPR Algorithm

Based on AI algorithm, the LPR function provides value-added data via a pre-trained deep learning model and continuously training to algorithms automatically. The Radar AI LPR Pro Bullet Plus Network Camera can not only recognize vehicle plates in real time, but also identify more vehicle features, generating reliable traffic insights.

AB ABC - 1234

Vehicle Type: Car
 Speed: 80 km/h
 Direction: Approach
 Vehicle Color: Orange
 Plate: ABC-1234
 Plate Color: White
 Count: +1

- AI-powered LPR Algorithm
- Vehicle Feature Recognition
- License Plate Recognition
- International Plate Support

Superior Image Quality

Milesight applies Sony's high sensitive 1/2" sensor whose capacity is approximately twice than that of the conventional ones. Its high sensitivity is designed for capturing saturated and sharp images even in pitch dark environment. The Milesight Radar AI LPR 4X/12X Pro Bullet Plus Network Camera is coupled with the 100fps high frame rate and 4K video viewing experience that deliver ultra-high-definition images with no latency despite of the high-speed movement.

<p>1/2" Sensor</p> <p>By Smart Phone By Milesight Camera</p>	<p>100fps High Frame Rate</p> <p>30fps@1080P 100fps@1080P</p>
<p>4K Viewing Experience (Coming Soon)</p> <p>4K 1080P</p>	<p>Smart IR II</p> <p>High Beam: 4*15° Low Beam: 2*60° Up to 180m IR distance</p>

Easy Deployment and Compact Structure

Featuring 4X/12X Auto Focus Lens, the Milesight Radar AI LPR 4X/12X Pro Bullet Plus Network Camera achieves a clear visual experience perfectly for long distance. As an all-in-one camera with 3D radar module, it is easy to deploy for the users. Do not worry if you are in complex environments, the well-designed integrated junction box and versatile interfaces ensure installation efficiency.
